- **... and many others**

Why SuperKlean Industrial Nozzles are Rated #1

SuperKlean manufactures the most extensive line of premium, long-lasting and ruggedized nozzles for virtually every plant, factory and commercial application. Hundreds of thousands of our industrial nozzles are in use every day in the most demanding applications across North America and the world, trusted by the world's most admired companies. Please visit our website or call SuperKlean at 800-769-9173 for immediate help in choosing the perfect nozzle for your application.

SuperKlean Hose Swivel Adapters Set the Standard for Excellence in Hot Water Washdown

SuperKlean DuraLife swivel hose barb adapters are the safest and most durable adapters for connecting hot water hoses to nozzles and mixing stations. For over 34 years SuperKlean has been the go-to manufacturer that hose distributors and factories trust. SuperKlean designs and manufactures each of our adapter products with longer-length hose barbs, enabling crimping or double-banding for unmatched safety, ensuring ultimate protection of every employee. We call our extensive line of hose adapters 'DuraLife' because with SuperKlean's unique O-ring design they will always outlast the hoses they are connected to.

SuperKlean O-ring design - traditional C-rings on competitor's barbs are prone to leaking

Competitor's length SuperKlean's 2 1/2" barb is longer, better, safer!

SuperKlean Custom Hose Service Ships the Best Industrial Hot Water Hoses, Same or Next Day!

SuperKlean has been professionally assembling custom hot water washdown hoses for over 34 years, using only the finest rubber and hose adapter materials. Every SuperKlean hose is shipped same or next day, worldwide, with secure crimping or double-banding to ensure no slippage, leaking, sharp edges, and most important, unmatched safety. If you require a hot water hose quickly, SuperKlean dropships to any location in the world, with 98% on-time shipments. All SuperKlean hot water hoses feature our own DuraLife hose barb adapters, available in high-quality stainless steel or brass, with hose prices that are very competitive. SuperKlean custom hoses are also available with external sleeves. Please call SuperKlean today at 800-769-9173 and we will immediately help you choose from our best hoses, with our perfect hose adapter connections for your specific application.

Quick Ships 98% of the time!

Engineered to Be the Most Environmentally Superior Hot Water Sanitation Products for the World's Leading Factories and Plants.

Fortune 1000 companies with plants and factories across the globe choose SuperKlean hot water sanitation equipment over all other competitors. For 34 years SuperKlean has been providing the world's safest, industrial-strength steam mixing stations and hot water nozzles that just last longer!

SuperKlean steam hose stations don't leak dangerous steam into hoses, potentially injuring employees. They feature industry-leading 3 year warranties, plus incredible 15 minute, on-the-wall preventive maintenance.

SuperKlean DuraLife hose barb adapters and LifeSpan Internal Hose Guards set the standard for rugged and longer-lasting hot water hoses that can operate up to 50% longer.

Leading plumbing and mechanical engineering firms, commercial contractors, industrial distributors, and plant safety and maintenance managers all agree SuperKlean products are their #1 solution for hot water sanitation for every type of industrial application. This includes new or existing plants and factories, as well as expansions and retrofits.

INDEPENDENTLY TESTED #1

AMONG THE TOP 5 STEAM MIXING UNIT COMPETITORS

15 years ago, a world leader in industrial steam products embarked on a year long in-depth comparison test of the world's best Steam Mixing Units. Their quest was to choose the world's best supplier to integrate into their famous steam product line.

This undisputed steam products leader, with over 1,000 steam engineers on payroll in over 30 countries, needed to ensure they provided their customers with the absolute best steam mixing stations available. After exhaustive testing, SuperKlean was chosen over 5 worthy competitors. Today, many years later, SuperKlean is still their sole partner for safe and environmentally exceptional steam and cold water washdown solutions.

"The #1 Most Trusted Hot Water Washdown Brand!"

10 Reasons Why SuperKlean DuraMix Hose Stations are Rated #1

Based on independent testing by steam industry experts.

INDUSTRY'S ONLY LOCKING MECHANISM

The steam lock nut, located behind the red hand-wheel, can be used to limit steam flow rate in the scenario that the desired hot water temperature output is too hot.

After achieving the desired water temperature output, use SuperKlean's innovative lock nut solution to limit the maximum steam flow rate so the desired temperature can be achieved each time both inlet globe valves are turned open. Please watch "Operation Tutorial video" for details.

COMMON MOUNTING DIMENSIONS

Heavy duty mounting plate shares mounting hole specifications with the leading competitive solution.

TECHNICALLY SUPERIOR DESIGN

SuperKlean's powerful and durable inner steam poppet design is a technological work of art. It provides ultimate safety against steam leakage, keeping your operators safe.

SAFEST DESIGN

SuperKlean leads the industry with our exclusive "Safety-First" steam unit design - does not pass dangerous live steam.

Without adequate water pressure, the steam poppet forms a seal with its poppet seat, preventing steam from entering the mixing chamber and hose.

Please view SuperKlean DuraMix 8000 Technical Video Presentation at www.superklean.com/downloads/

SECONDARY OUTLET

A SuperKlean customer favorite feature. Provides additional hot water source.

PRIMARY OUTLET

Increasingly, Plant Safety Managers are switching to SuperKlean 8000's based on competitive units leaking hazardous steam into hoses and nozzles.

3 YEAR WARRANTY

All SuperKlean DuraMix 8000 Series steam units feature an incredible industry-leading 3 year warranty. SuperKlean Hose Stations just last longer!

LOW PRESSURE? NO PROBLEM!

Operates on as little as 30 PSI, all the way up to 150 PSI! This exclusive wide range can perfectly handle fluctuations in steam and water pressure over a wide range of piping scenarios.

SET TEMPERATURE ONCE: IMPROVE PRODUCTIVITY!

SuperKlean's temperature control hand-wheel design provides a convenient and precise one time temperature adjustment. Once the desired output temperature is set with the temperature control wheel, only the globe valves need to be fully opened to achieve the previously set temperature. No need to adjust the globe valves each time you operate!

BY FAR THE EASIEST STEAM HOSE STATION TO MAINTAIN

Preventive maintenance on SuperKlean's DuraMix 8000 is the fastest, easiest, and lowest cost in the washdown industry! Watch our online 8000 Maintenance Video and you will be amazed at how we excel over the competition. Your manpower and cost savings over the life of the unit is substantial. All it takes is 15 minutes and one \$3.66 replacement gasket!

Now Available in Thermostatic and Ball Valve Versions!

ALL-IN-ONE PACKAGING

Comes packaged with everything pictured (except optional thermometer) for immediate installation.

SuperKlean DuraMix 8000 Case Studies And Testimonials

The following Case Studies show why SuperKlean hot water Hose Stations are the best in the world, especially when it comes to safety. SuperKlean offers no cost 90 day evaluations on all SuperKlean Hose Station products! We pay shipping to you, and if you are not satisfied, we pay shipping back - no questions asked.

"The World's Safest and Most Trusted Washdown Brand for Sanitizing Factories and Industrial Plants."

Testimonial:

"SuperKlean's DuraMix 8000 Steam Mixers are the best I have used in my 30 years in the food processing business. They are the Cadillac of mixing stations, and all the others are like Model T's!"

- Plant Manager for one of America's largest frozen strawberry producers.

Case Study #1

This world famous flavoring and fragrance leader struggled with steam mixing stations for decades, controlling temperature of water and most recently fighting steam leaking into hoses through competitors mixing stations. The Plant Safety Manager provided a tour to demonstrate the problem. He said "stand back," picked up a hose and started spraying, with dangerous steam coming out of the nozzle. After 5 seconds or so the steam sputtered with hot water, then finally produced a steady stream of hot water. This company has now replaced over 40 of the competitor's steam mixers with SuperKlean DuraMix 8000 units.

Case Study #2

A billion dollar food and condiments manufacturer with over a dozen U.S. locations was having issues with steam leaking into hoses, bursting them, and in one instance, blowing off a nozzle completely. (See photo of burst hoses at the right.) This Plant Safety Manager is in the process of replacing up to 60 of these competitor's steam units with SuperKlean's Duramix 8000. Safety and Maintenance Managers at this company's other locations are now doing the same.

Case Study #3

A worker at a dairy in the Northwest had been spraying and sanitizing, set the hose with nozzle down and came back about an hour later to continue. He mistakenly pointed the nozzle at himself, burning himself with steam that had accumulated in the hose. He needed to be taken for special medical assistance. The distributor who sold the competitor's steam units replaced the leaking steam units at this dairy with SuperKlean DuraMix 8000 steam stations.

Please call SuperKlean at (800) 769-9173 or contact one of our Authorized Distributors to set up your free no-cost evaluation of SuperKlean products.
